Funds ovarian cancer research, with more than \$11 million invested since 1996

Supports high-risk prevention and early detection screening programs for ovarian and breast cancer

Brings education about ovarian and breast health to women through our signature CanCan education program

For \$1 invested, Rivkin Center-funded researchers leverage an additional \$8.50 from other funding sources.

our vision is that women no longer die of ovarian cancer.

### **SCIENTIFIC PROGRAMS**

In 2017, we awarded \$1,125,000 in scientific grants to ovarian cancer researchers around the globe.

The Rivkin Center received 138 applications for both Pilot Study and Scientific Scholar Awards for the 2017 funding period and 178 applications for the 2018 funding period, a record high. Ovarian cancer is an underfunded disease and the number of applications received reinforces the value of private funding for ovarian cancer research at a time when federal funding available for this type of work remains increasingly scarce.

#### 2017 Awards

- 11 Pilot Study Awards (\$75,000 over one year)
- 2 Scientific Scholar Awards (\$120,000 over two years)
- 2 Bridge Funding Awards (\$30,000 over six months)

Since our inception in 1996, the Rivkin Center has awarded more than \$11 million in ovarian cancer research grants to scientific investigators around the globe, making us one of the oldest and largest non-profit funders of ovarian cancer research.

# **Symposium**

The Rivkin Center launched the first Northwest Gynecological Cancer Symposium (NGCS), held December 4, 2017 at the Fred Hutch in Seattle, WA. NGCS welcomed more than 80 experts in gynecological cancer research from Washington, Oregon, and British Columbia for the 1-day symposium. Invited speakers included Dr. Gordon Mills (MD Anderson/Knight Cancer Institute), Dr. Denise Galloway (Fred Hutch), Dr. Garnet Anderson (Fred Hutch), and Dr. Brad Nelson (British Columbia Cancer Agency).

The 12th Biennial Ovarian Cancer Research Symposium will take place on September 13-15, 2018 at the University of Washington in Seattle. The event is presented in partnership with the American Association for Cancer Research (AACR) and more than 400 attendees from around the world are expected to foster new research collaborations, exchange ideas, and share knowledge of ovarian cancer.

## **EDUCATIONAL PROGRAMS**

CanCan is the educational program of the Rivkin Center providing ovarian and breast health education and awareness to the community. CanCan empowers individuals to take action about their health, giving them tools for early detection, prevention, and self-advocacy. CanCan educates women in communities throughout the Pacific Northwest, and at all of the PAC-12 college campuses.

#### **2017 Stats**

- 6,136 individuals educated in 2017
- 182 CanCan parties workshops) held
  - 95 Community CanCan parties in the Pacific Northwest
  - 87 Campus CanCan parties at the following schools: University of Washington, Washington State University, University of Oregon, Oregon State University, University of Southern California, University of California Berkeley, University of California Los Angeles, Arizona State University, University of Arizona, and the University of Utah

# PREVENTION, SCREENING, & EARLY DETECTION

The Rivkin Center has partnered with Swedish Cancer Institute to support the development of the Breast and Ovarian Cancer Risk Education, Assessment, and Management (BEAM) observational study. BEAM will enroll 900 women at high risk for breast, ovarian, and other genetically-related cancers to participate in cancer risk assessment and education, genetic counseling and testing, and screening and/ or prevention. BEAM will establish centralized clinical and research data that can be used in future high risk research studies.

# 2017 FINANCIALS

(January 1, 2017 to December 31, 2017)

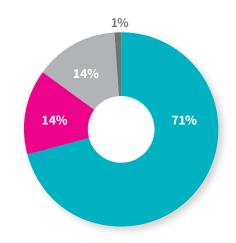

#### Revenue

Fundraising Events	\$2,003,139
Individual & Planned Gifts	\$603,153
Corporations & Public Foundations	\$71,854
Symposium	\$9,000
Total Revenue	\$2,687,146
Gifts In-Kind	\$201,133

# **Expenses**

Total Expenses	\$2,494,589
General and Administrative	\$142,364
Human Resources	\$414,704
Fundraising	\$238,970
Programs & Distributions	\$1,698,551

<sup>\*</sup>Figures include all cash received during fiscal year 2017. At the time of production, a formal audit of 2017 has not yet been conducted.

# **Program Expenses**

Scientific Grants	71%
Scientific Program Expenses	14%
CanCan Program Expenses	14%
Research Symposia	1%
